

product	sheet size (mm)	sheets per pack	RRP
---------	-----------------	-----------------	-----

anti vibration and anti resonance materials

very flexible multi-layered damping waterproof materials adheres to uneven surfaces tightly and provides high vibration damping results, high quality polymer based on butyl rubber - applied on aluminum foil, supplemented with anti corrosive additives to ensure that the treated surface does not rust, highly self-adhesive

MOST USE IN THE CAR : assembly on metal parts - doors, roof, trunk and floor to prevent vibration and resonance

EVOTEC 2.0		370x250x2 mm Package size: 3,7 m ²	40	119,90
EVOTEC 2.4		370x250x2.4 mm Package size: 3,7 m ²	40	139,90

sound absorbing foam materials

polyurethane foam material with special impregnation, superb sound absorption properties, water resistant, self-adhesive

MOST USE IN THE CAR : door boards - interior plastics, speaker boxes, prevents plastic parts against rattling - fills the gaps between the surfaces

Absorber 5		500x1000x5 mm Package size: 10 m ²	20	279,90
Absorber 10		500x1000x10 mm Package size: 5 m ²	10	199,90
Absorber 15 WAVE		500x1000x15 mm Package size: 5 m ²	8	159,90

noise-proofing insulation - foam-insulating materials with a closed structure

noise and thermal insulating materials, very flexible synthetic polymer - easy install to flat and curved surfaces, water and oil resistant, self-adhesive

MOST USE IN THE CAR : Fitting to a vehicle doors, side panels and floor to prevent road noise and help insulate the cabin

Neoprene 6		500x1000x6 mm Package size: 7,5 m ²	15	224,90
Neoprene 10		500x1000x10 mm Package size: 5 m ²	10	209,90

noise and thermal insulating materials, very flexible synthetic polymer - easy install to flat and curved surfaces, water and oil resistant, self-adhesive

MOST USE IN THE CAR : Fitting to a vehicle side panels, roof and floor, the best performance on the floor under original carpets

Isolator 4		500x800x4 mm Package size: 12 m ²	30	209,90
Isolator 8		500x800x8 mm Package size: 6 m ²	15	194,90

product	sheet size (mm)	sheets per pack	RRP
---------	-----------------	-----------------	-----

anti vibration and noise-proofing insulation - three-layer damping material

very flexible multi-layered damping waterproof materials adheres to uneven surfaces tightly and provides high vibration damping results, high quality polymer based on butyl rubber + the third layer noise and thermal insulating materials -synthetic polymer, water and oil resistant, self-adhesive

MOST USE IN THE CAR : assembly on metal parts - doors, roof, trunk and floor to prevent vibration, resonance and noise

MULTIFLEX

370x250x6 mm
Package size: 1,4 m²

15

74,90

anti-corrosion mastic greatly reduce noise and vibrations

anti-corrosion mastic greatly reduce noise and vibrations, should be applied on dry, defatted, clean from the dust and rust surface, after drying mastic forms a solid protective resistant to mechanical impact.

Composition: Bitumen, butyl rubber, industrial oils, fillers, solvent.

MOST USE IN THE CAR : assembly on metal parts - car chassis and insulation of car arches

NOISE KILLER

2kg

1

22,90

usual consumption of material: 1,2-1,5 kg on 1 square meter
